## **Industry-Leading Internet-Filtering Technology Gets Major Retail Distribution**

*Phantom Technologies' iBoss Products Now Available at Micro Center and microcenter.com*

**San Diego (October 2008)** — Expanding its retail reach, Phantom Technologies, makers of the powerful iBoss line of web-filtering products, announces the availability of its all-in-one iBoss Home Parental Control and iBoss Pro80 Business Web filters at Micro Center stores nationwide and at microcenter.com.

Micro Center shoppers can now purchase the most advanced Web-filtering hardware on the market today at all 21 Micro Center stores in major cities across the U.S., as well as online. As with all iBoss Web Filters, users have access to the latest features and performance updates via downloads directly into their iBoss Web-filtering product. All iBoss products sold at Micro Center are also covered by Phantom Technologies' award-winning, U.S.-based customer support.

The industry-leading iBoss Web Filters provide homes and small businesses with a comprehensive hardware-based shield against viruses, spyware, and other online hazards. Featuring integrated Wi-Fi capabilities, the iBoss Home also protects children from online predators through any wireless-enabled device, including laptops, gaming consoles, and PDAs. Likewise, the iBoss Pro80 allows employees to safely connect to their company's network wirelessly, while protecting employers against loss of productivity through excessive Web surfing and drains on bandwidth. Their easy-to-use, award-winning platform and no per-user licensing fee give iBoss Web Filters a decided edge in Internet-filtering technology.

“We are very excited to join forces with Micro Center's extensive distribution channels to offer more consumers the most advanced tool for protecting home and business networks against the myriad dangers lurking all over the Net today,” says Phantom Technologies CEO Paul Martini. “Like Micro Center, our focus with the iBoss line of Web-filtering products is to give individual consumers and small business owners the performance and value they want and deserve.”

-more-

Headquartered in San Diego, California, Phantom Technologies uses patent-pending, proprietary technology to produce its unmatched line of iBoss Web Filters, protecting networks of all sizes, from the home to large corporations and governments. Its software-free filtering technology guarantees seamless deployment, powerful URL and application filtering, and robust drill-down reporting, all bundled into a powerful state-of-the-art hardware appliance that integrates an award-winning user interface, allowing for simple management.
